#### The City Press.

The Union and American-The Banner's article on the inconsistency of certain Breckinridge Democrats in Tennessee draws out the Union and American to the length of half a column Read one sentence and behold how brillianily the champion of the Let-her-rip Democracy k weeks the heels from and r our unfortunate neighbor of the Banner. "If the charge were true," says the Union and American. "that certain prominent supporters of Mr. BRECKE RIDGE once favored Squatter Soverlegaty and now algares that heresy it ought it seems to us to be a matter of rejoicing, not of reviling, to the Banner; that paper baying within the last few weeks declared that the odious doctrine of Squatter Soveriegnty is fully pronounced by Southern Democrats 'a short cut to all the ends of Black Republicani-m." We do not remember that we ever saw, in the whole course of our newspaper career, a finer display of logic and punctuation than is to be found in the above sentence. Inexperienced reasoners would probably say that it amounts merely to a begging of the question; but such is not the case. When men favor an odious doctrine from motives of expediency one day, and re-I have sold out my entire interest in the firm of pudiate it from motives of expediency the next-when politicians sin for partizan purposes to-day, and contritely cry peccari for partizan purposes to-morrow-all wise and just men should forget the doctrine and the sin, and rejoice with an exceeding great joy I would probably have something to say in that the sinners have turned from the evil of reply on my return. In this he was mistheir way. So should our neighbor of the taken. baving large windows at each end, and each

side. The ventilation of the other stories is

principally turnished by side windows; and

openings into the passages. The large balls

n the third story, as the house was originally

built, were intended for the high school de-

partment ; but the want of sufficient room for

the various classes, when the Schools were

started, made it necessary to run a partition

wall across these halls, and thus nake four

rooms to accommodate as many classes. The

want of suitable rooms for the high school

department is an evil which has been a riou-

ly felt. Happily, the completion of the How-

ard Building, the third school bouse con-

structed by the city, affords the Board of Ed-

ucation an opportunity to remedy this evil

by restoring the balls of the Hume Building,

third floor, to their original dimensions. To

do this, they had simply to order the remov-

al of the temporary partitions, coasist ng

placed there long after the completion of the

building. But, for the purpose of having

we apartments for recitation, board parti-

tions, half the length of the halls, have been

un across them near the northern end .-

These partitions may be lowered or elevated

y means of cords, pulleys and slides, which

have been provided. When the recitation

ooms are in use, they will be down, and up

when the rooms are not in use. This ar-

angement prevents any obstruction of ven-

ilation, and is, in that respect, commenda-

ble These halls will hereafter be set apart

for the high school department-the east for

the girls; the west for the boys. And being

thus provided with ample room, more com-

We again present our readers with numerous xtracts, from papers published in the surroundin ountry, giving an account of the condition of the rops in the words of persons living on the spot This week the statement h s greatly lost the hue o. orightness it so lately bore. It is evident that in many places the corn crop is a failure, and the mos intense fears of absolute want exist. An item we publish, separate from the "crops,' headed "starvaanticipations. Our extracts are necessarily brie. that they may be numerous; if we had quoted at den vegetables and the sweet potato crop are in the same condition as the corn. The failure of the corn crop is not universal, however; the rains since spring have usually been of a partial character, and tations often greatly differ in consequence. Ou space did not admit of extending our extracts, but if we had copied from the papers of other southern States, the paragraphs would have been of the same general teuer; for instance, the editor of the Commibus (Ga.) Times, who has recently made a journey throug the south western counties of that State, says that corn will not make a third of a crop, and that cotton locks almost as bad as corn. The writer ancipates hard times all through the country. In ousiana the Raymond Gazette proclaims that "the almost continued drouth which has prevailed from the planting season up to the present time, has played sad hovoc with the corn crop throughout the State. In many parts of this county the crop is almost a failure, while in the adjacent counties, it may be said to be entirely so. From the northern, south

The selections of "Crop Items" we give from tim to time, are of great interest, and we would a a our friends, the editors of country newspapers, to be regular in furnishing their report of the condition of the growing crops around them; we shall be glad to copy, giving them due credit. The crops are of the first importance to the country. They are the great sources of her wealth, and the supporters of her prosperity. Information as to their condition must therefore be of continual interest. Let those (the country editors) who can, be industrious in furnish ug into-mation.

By ROB. J. CULVERWELL, M. D.,

The important fact that the awful consequences of self-abuse may be effectually removed without internal medicines or the dangerous applications of caustics, instruments, medicated bougies, and other empirical devices, is here clearly demonstrated, and the entirely new and highly successful treatment as adopted by the celebrated auther fully explained, by means of which every one is enabled to cure himself perfectly, and at the least possible cost, thereby avoiding all the advertised nostrums of the day. This Lecture will prove a boon to thousands and thousands.

The experience of thousands daily proves that no preparation of Iron can for a moment be compared with it. Impurities of the blood, depression of vital energy, pale and otherwise sickly complexions indicate its necessity in almost every conceivable case. In all cases of female debility (finor albus, chlorosia, etc.), its effects are delightfully renovating. No remedy has ever been discovered, in the whole history of medicine, which exerts such prompt, happy, and fully restorative effects. Good appetite, complete digestion, rapid acquisition of strength, with an unusual disposition for active and cheerful exercise, immediately follow its use.
